

Project: Old Testament Textual Analysis

Overview

Pick one of the topics below.

1. OT references
 - a. Determine how to find an OT reference/allusion
 - b. Does Matthew contain more OT references/allusions than John? OR Does Matthew contain more OT references/allusions than Paul's epistles?
 - c. Which OT books are most often alluded to? Make a network.
 - d. What are the thematic differences between the types of allusions? (look at verses *around* the quoted/referenced text to text to see if there are other ideas being linked)
2. Chiasms
 - a. Replicate [this work](#) on Chiasms
 - b. Determine the central idea (often in the center of a chiasm) to see what the distribution of central ideas is across Scripture
3. Authorship
 - a. Replicate [this work](#) on authorship or [this work](#) on literary origins
 - b. Extend it
 - c. Use the framework to exploring something regarding interpretation
4. Hebrew vs Septuagint
 - a. How different is the Septuagint from the original Hebrew text?
 - b. Do the same theological concepts/words pair in the Hebrew manuscripts as the Septuagint?
5. Find another project from the metanalysis project or [this github](#) repo. Replicate the work and extend it in an interpretation direction.

You will clean up the data (if necessary) and explore it. Once you have mined the data appropriately, you will need to present what you have found. Your visualization must include a gif, information presented in a map-type format, and summarizing plots to tell a story alongside summarizing statistics. The mini-poster (18"x24" in any orientation) may include a subset of this information. Rubric below.

Submission

If any of these elements is missing, you will be asked to use a token to resubmit. No further grading will be done.

- M/N Project submitted on time (see Moodle deadline)
- M/N All work (data, code, and presentation in PPT form) is located on a github repository
- M/N Github repo has a detailed README
- M/N Github repo is shared with KatrinaKoehler
- M/N Notebook(s) run in situ with no issues (package dependencies are provided)
- M/N Rubric and PPT handout (6 slides in horizontal format) is uploaded to Moodle as a single PDF

Data is not tortured

[Replace this text with your self-given grade (A, B, C, D, F) and evidence for this]

Data is visualized appropriately during exploration

[Replace this text with your self-given grade (A, B, C, D, F) and evidence for this]

Presentation

[Replace this text with your self-given grade (A, B, C, D, F) and evidence for this]

Submission

If any of these elements is missing, you will be asked to use a token to resubmit. No further grading will be done.

M/N Project submitted on time (see Moodle deadline)

M/N Report is uploaded to arxiv.org

M/N Rubric is uploaded to Moodle

Research Paper

- Paper effectively tells a cohesive scholarly argument.
The main thesis in a single sentence is:
- Title is clear, specific, and reflects the main argument of the paper.
- Abstract (≤ 150 words) concisely summarizes the purpose, method, and findings.
- Introduction clearly states the research question, explains its importance, and defines the scope.
- Literature review accurately represents, evaluates, and engages with relevant scholarship.
- Methods section explicitly describes how data/texts were chosen and analyzed.
- Results/Analysis section presents findings clearly, with appropriate evidence and/or visualizations.
- Discussion interprets the significance of the results and relates them to broader scholarship.
- Conclusion succinctly summarizes the argument and identifies implications or future directions.
- References are complete, accurate, and formatted according to JBL style guidelines.
- Writing is clear, concise, and free of major grammar/style errors.
- Argumentation is logical, coherent, and supported with evidence.
- Secondary sources are cited accurately and consistently in JBL style.
- Primary texts (biblical or otherwise) are quoted and referenced with precision and consistency (JBL abbreviations, transliteration if needed).
- Figures, tables, or visualizations (if used) are necessary, sufficient, and beautiful.
- Figures, tables, or visualizations (if used) are labeled, cited, and integrated smoothly into the text.
- Paper shows evidence of critical engagement, not mere summary (student analyzes, interprets, or extends prior work).
- Length of paper meets assignment requirements (e.g., 12–15 pages, double-spaced).
